ABOUT ME

I am a technology and data enthusiast, currently a graduate in Industrial Civil Engineering and pursuing my second degree with a Master's in Industrial Engineering. My main objective is to find opportunities that allow me to apply my knowledge and foster my intellectual growth. I have a strong interest in exploring new areas and aspire to develop jointly with the company and my work colleagues.

I enjoy collaborating in multidisciplinary teams, contributing proactively and providing support in the best way possible. I find great satisfaction in teaching and learning from my peers. In addition, I have practical experience in the field through projects, ventures, and research work in which I have actively participated in work teams.
